AB - The present invention relates to a medicinal soap for curing pedopathy. The medicinal soap is made up by using (weight portion) soap flake 51-27, glycerine 20-30, calamine 5-10, coptis root 10-12, borneol 3-6, sulfur 1-3 and phellodendron bark 10-12 through a certain preparation process. The soap can be used for curing loempe, tinea pedis, beriberi, foot sweat and foot odour, and at the same time, it also possesses a certain therapeutic effect for curing armpit odour, dermatitis and tinea.
